

1) Description of the project.

The project is to create a web site for Arthur County. The site will allow public access to a directory of County Government information, Village Board and Trustee information, tourism points of interest and local activities. The site will also be used to post information about Commissioner and Village Board meetings. The plan is to include pictures of local tourism attractions and contact numbers for tours and area agendas. Links are planned to local business owner's sites, State of Nebraska and U.S. Federal locations.

The goal is to utilize the knowledge and growing expertise of our young people to create the web site. Our county has several interested students who vary in age from High School to College attendees who are capable of completing this project. In allowing our youth to participate in this type of awareness outlet, we hope to grow pride in our area and build community commitment.

8) Expenses for the completion of a Website for Arthur County/Village of Arthur

Domain Name	\$15.00 per year
